

March 1, 2010

Dear People,

As a customer of SCE&G, I am appalled at the proposal Docket #2009-489-E.

In a time of major economic unrest, unemployment the highest since the last depression and over 8 million jobs lost, this proposal is unrealistic and shows very poor management and very poor fiscal responsibility. People all around our state are struggling to make ends meet. Just look around or watch the news occasionally. Have they looked at all possibilities of cutting costs? I doubt it.

Please study this proposal very carefully with the ramifications it will have on the citizens of our state. If you do, I am sure you will find it a very bad time for any increase and reject the issue.

Thanks for your time.

Sincerely,

Joe Snecinski
